OBJECTIVE

Ambitious Computer Science student with a solid foundation in backend development (.NET ecosystem) and cybersecurity (penetration testing). Seeking a challenging internship or entry-level opportunity to leverage strong hands-on skills in C# , ASP.NET Core , SQL Server , network security (CCNA) , and Kali Linux to design scalable backend systems and robustly evaluate system infrastructure defenses

EDUCATION

Assiut National University (ANU)

2024 - Present

Faculty of Computers and Artificial Intelligence – Department of Computer Science

Completed 2nd Year

EXPERIENCE

Academic & Hands-on Projects (Cybersecurity & Software Engineering)

- Conducted vulnerability assessments and simulated cyberattacks on lab environments using Kali Linux, identifying and documenting critical security flaws to improve system defense.
- Configured and secured network infrastructures applying CCNA principles, implementing firewalls and access control lists (ACLs) to mitigate unauthorized access.
- Evaluated web application security postures against the OWASP Top 10 vulnerabilities, successfully mitigating risks related to SQL injection and Cross-Site Scripting (XSS).
- Developed and optimized scalable web APIs using C# and ASP.NET Core, incorporating Object-Oriented Programming (OOP) and SOLID principles to ensure code maintainability.
- Designed and implemented relational database schemas using SQL Server, ensuring data integrity and writing secure, high-performing queries.

COURSES & TRAINING

- **CCNA (Cisco Certified Network Associate) Training Series** – Cisco Networking Academy
- **Algorithms & Data Structures Specialized Training**
- **Full Stack .NET Development Track (Round 5 Application)** – Egypt Digital Pioneers Initiative
- **Microsoft & Sprints Summer Camp Intensive Program** – Sprints X Microsoft
- **Front-End Web Development Bootcamp (HTML, CSS, JavaScript)** – National Council for Women X Sprints

TECHNICAL SKILLS

Core Backend Development : C# , .NET Ecosystem , ASP.NET Core Web API , OOP , SOLID Principles , Design Patterns

Cybersecurity & Networking : Penetration Testing , Ethical Hacking , Vulnerability Assessment , OWASP Top 10, CCNA Principles

Operating Systems & Tools : Kali Linux , Linux , Wireshark , Nmap , Metasploit , Git / GitHub

Databases & Web Basics : SQL Server , Relational Schema Design , Data Structures & Algorithms , HTML , CSS , JavaScript

SOFT SKILLS

- Analytical Thinking & Problem-Solving (Demonstrated through structured algorithmic training).
- Attention to Detail (Critical for tracking complex calculations, architecture boundaries, and security vulnerabilities).
- Adaptability & Continuous Learning (Balancing software development and offensive security domains).
- Collaboration & Teamwork (Proven via participation in community bootcamps and intensive training camps).
- Strong Technical Documentation and analytical reporting skills.
